memo from the desk of  
Bishop Banks

4/27/89

*Dr. Brennan*

- only problem I know about was 10 years ago
- I advised him not to work with kids in his parish work
- I knew of no recurrence
- you better clip his wings before there is an explosion.
- you can't afford to have him in a parish!
- since '84 my contacts have been scaled back. I thought everything was under control
